You are interested in it and ask your partner what types of buildings these are by following the example below. Then substitute the underlined with the words given below and reverse roles afterwards, so that both students get the opportunity to ask and respond to the query.

B: นั่นโรงเรียนครับ

1. บ้าน
2. ห้องเรียน
3. อพาร์ทเมนต์
4. ศูนย์การค้า

Afterwards, they will draw a sketch of the room and depict the location and nature of the objects. When each pair has had their chance, pairs will report to the class on what they determined was the correct layout. The instructor will officiate.

**Exercise 6 (Pair Work)**

The task is to reinforce the ability to ask and describe objects and locations. Using the information from the previous activity, each pair will practice asking and answering queries about the locations of objects.

## 1. Thai numbers

Thai numbers of more than one digit are systematically formed. For example, 10 and 2 are combined to form 12, 3 and 10 are combined to form 30. The only exceptions are numbers between 11 and 91 that end in one (21, 31, etc.), and the number 20.

These numbers are formed somewhat differently. In this case, **เอ็ด** is used in place of **หนึ่ง**, which is the regular word for one. For number twenty, **ยี่** is used in place of **สอง**, which is used in all other cases.

### Exercise 1

Say the following numbers in Thai and write them down in Thai numbers

- |    |    |       |
|----|----|-------|
| 1. | 11 | _____ |
| 2. | 16 | _____ |
| 3. | 10 | _____ |
| 4. | 8  | _____ |
| 5. | 20 | _____ |

## 2. Classifiers

A classifier is a must in Thai whenever a noun and a number are used together. All Thai nouns do have their own classifiers, and we will put them in this order: noun + number + classifier.

Example:

บ้านสามหลัง	=	Three houses
เด็กสี่คน	=	Four children
โต๊ะหกตัว	=	Six tables

### 3. ก็ . . .

It means "how many . . ." and is considered a number-like word in Thai. Hence, it requires a classifier to go with it. The formula for the use of **ก็** is: noun + **ก็** + classifier. However, if the noun and the classifier are identical, the noun is usually omitted.

Example:      **นักเรียนก็คน** =      How many students?  
                  **(ห้อง)ก็ห้อง** =      How many rooms?  
                  **(ชั้น)ก็ชั้น**    =      How many floors?

4.      How many books?      \_\_\_\_\_
5.      How many teachers?      \_\_\_\_\_

### 3. . . . นี้

This word is an adjective meaning "this." It cannot be used as a noun as in English. When using this word, a noun and its classifier are always required. If the noun and its classifier are identical or the classifier is understood, the noun may be dropped.

Example:      **เด็กคนนี้**      =      this child  
                  **(ห้อง)ห้องนี้** =      this room  
                  **บ้านหลังนี้** =      this house

Translate the following phrases into Thai.

1. This school \_\_\_\_\_
2. This teacher \_\_\_\_\_
3. This student \_\_\_\_\_
4. This building \_\_\_\_\_
5. This banana \_\_\_\_\_

**5. Use of " ที่ "**

This is a relative pronoun meaning either "that, which, who, whom," or "where."

Example: หนังสือที่คุณมี = the book that you have.  
รถที่คุณขับ = the car which you drive.  
นักเรียนที่อยู่ในห้อง = the student who is in the room.  
ครูที่คุณเห็น = the teacher whom you see.
